More than 37,000 Registered Nurses voluntarily participated in this survey. Without their efforts the work of the center would not be possible. The Department of Health Professions, the Healthcare Workforce Data Center, and the Board of Nursing express our sincerest appreciation for your ongoing cooperation.

Thank You!

Virginia Department of Health Professions

Weldon Cooper Center for Public Service

Source: Va. Healthcare Workforce Data Center

37,072 Registered Nurses (RNs) voluntarily took part in the 2014 Registered Nurse Workforce Survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place during a two-year renewal cycle on the birth month of each respondent. Therefore, only approximately half of all RNs have access to the survey in any given year. Thus, these survey respondents represent only 37% of the 100,766 RNs who are licensed in the state but 85% of renewing practitioners.

The HWDC estimates that 82,998 RNs participated in Virginia's workforce during the survey period, which is defined as those who worked at least a portion of the year in the state or who live in the state and intend to return to work as an RN at some point in the future. Between October 2013 and September 2014, Virginia's RN workforce provided 72,089 "full-time equivalency units", which the HWDC defines simply as working 2,000 hours a year (or 40 hours per week for 50 weeks with 2 weeks off).

94% of all RNs are female, while the median age of all RNs is 48. In a random encounter between two RNs, there is a 35% chance that they would be of different races or ethnicities, a measure known as the diversity index. The diversity index for RNs who are under the age of 40 is higher at 40%, but even this group of RNs is still less diverse than Virginia's population as a whole, where there is a 54% chance that two randomly chosen people would be of different races or ethnicities.

38% of all RNs grew up in a rural area, but only 19% of these professionals currently work in non-Metro areas of the state. Meanwhile, 55% of Virginia's RNs graduated from high school in Virginia, while nearly two-thirds earned their initial professional degree in the state. In total, just 68% of Virginia's RN workforce has some educational background in the state.

40% of RNs hold a baccalaureate degree as their highest professional degree, while 34% earned an associate degree. More than one-third of RNs currently carry education debt, including 58% of those under the age of 40. The median debt burden for those RNs with educational debt is between \$20,000 and \$30,000.

88% of RNs are currently employed in the profession. Two-thirds of all RNs hold one full-time position, while 10% hold two or more positions simultaneously. 38% of RNs work between 40 and 49 hours per week, while just 4% work at least 60 hours per week. Meanwhile, nearly two-thirds of RNs have been at their primary work location for more than two years, although 2% of RNs have experienced involuntary unemployment at some point in the past year.

The median annual income for RNs is between \$50,000 and \$60,000. In addition, 83% of wage or salaried RNs also receive at least one employer-sponsored benefit, including 64% who receive health insurance. 92% of RNs are satisfied with their current employment situation, including 58% who indicate they are "very satisfied".

71% of all RNs work in the regions of Northern Virginia, Central Virginia, and Hampton Roads. 20% of RNs worked at two or more locations in the past year. More than 80% of RNs work in the private sector, including 42% who work at a for-profit company. Nearly 40% of RNs work in the inpatient department of a hospital at their primary work location, the most of any primary establishment type.

A typical RN spends nearly all of her time treating patients. Nearly two-thirds of RNs serve a patient care role, meaning that at least 60% of their time is spent in patient care activities. Approximately 55% of patients seen by the typical RN are adults, and 37% of RNs serve an adult patient care role, meaning that at least 60% of their patients were adults.

41% of RNs expect to retire by the age of 65. 7% of the current workforce expects to retire in the next two years, while half the current workforce expects to retire by 2039. Over the next two years, only 5% of RNs plan on leaving either the state or the profession. Meanwhile, 8% of RNs plan on increasing patient care activities over the next two years, and 33% expect to pursue additional educational opportunities.

Definitions

- The Survey Period:** The survey was conducted between October 2013 and September 2014 on the birth month of each renewing practitioner.
- Target Population:** All RNs who held a Virginia license at some point during the survey time period.
- Survey Population:** The survey was available to RNs who renewed their licenses online. It was not available to those who did not renew, including RNs newly licensed during the survey time frame.

Definitions

- 1. Virginia's Workforce:** A licensee with a primary or secondary work site in Virginia at any time during the survey timeframe or who indicated intent to return to Virginia's workforce at any point in the future.
- 2. Full Time Equivalency Unit (FTE):** The HWDC uses 2,000 (40 hours for 50 weeks) as its baseline measure for FTEs.
- 3. Licensees in VA Workforce:** The proportion of licensees in Virginia's Workforce.
- 4. Licensees per FTE:** An indication of the number of licensees needed to create 1 FTE. Higher numbers indicate lower licensee participation.
- 5. Workers per FTE:** An indication of the number of workers in Virginia's workforce needed to create 1 FTE. Higher numbers indicate lower utilization of available workers.

This report uses weighting to estimate the figures in this report. Unless otherwise noted, figures refer to the Virginia Workforce only. For more information on HWDC's methodology visit:
